HOW TO APPROACH PROBLEM

1) Understand the Problem
2) Enter Appropriate input values
3) Create Logics / Algorithms

WHAT IS PSEUDOCODE?

It is step-by-step written outline of your code that you can gradually transcribe into programming language.

EXAMPLE Sum of A & B

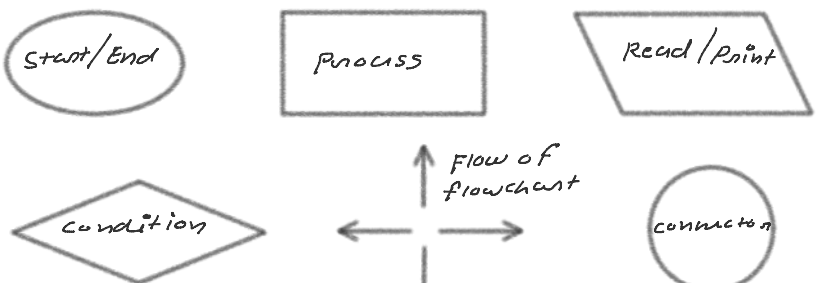

PSEUDO CODE EXAMPLE

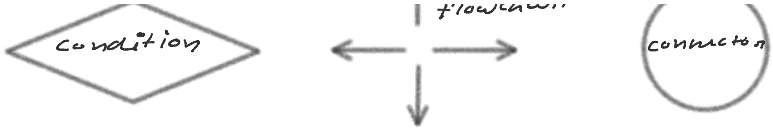

- Take input a & b
- Let sum = a+b
- Print sum

WHAT IS FLOWCHART?

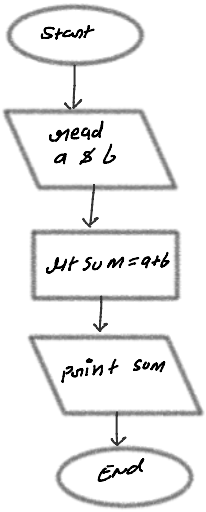

It is a diagramatically representation of an algorithm.

Components of Flow Chart

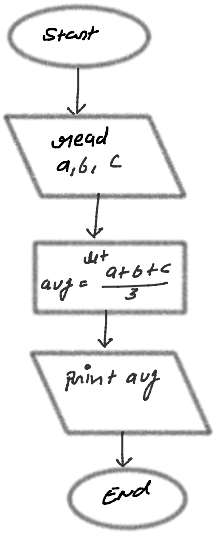

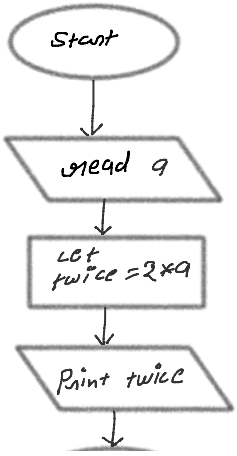

→ Print sum of A & B.

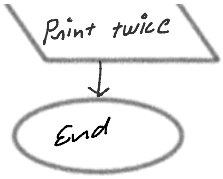

→ Average of a, b, c

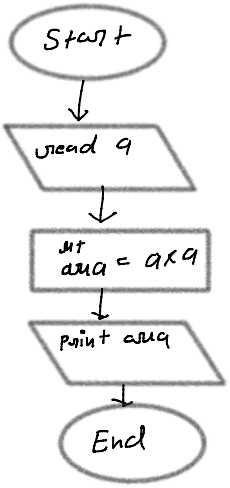

→ Print twice of a

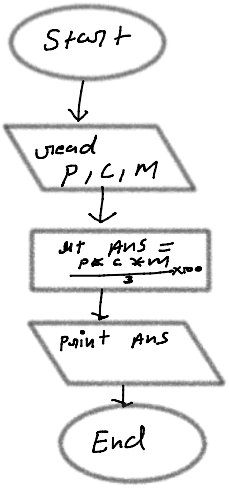

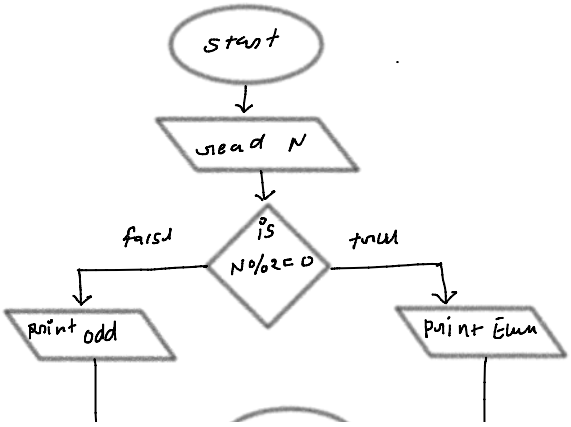

→ Find area of square

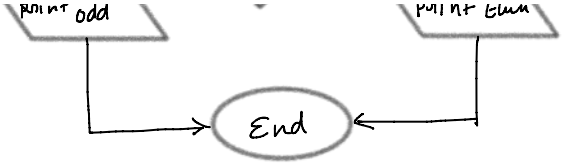

→ calculate overall percentage from marks

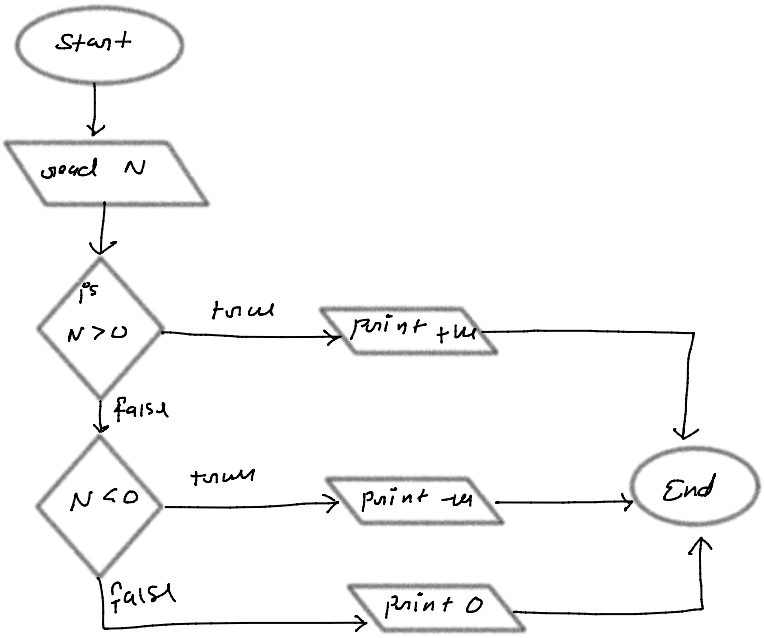

→ check if number is even/odd

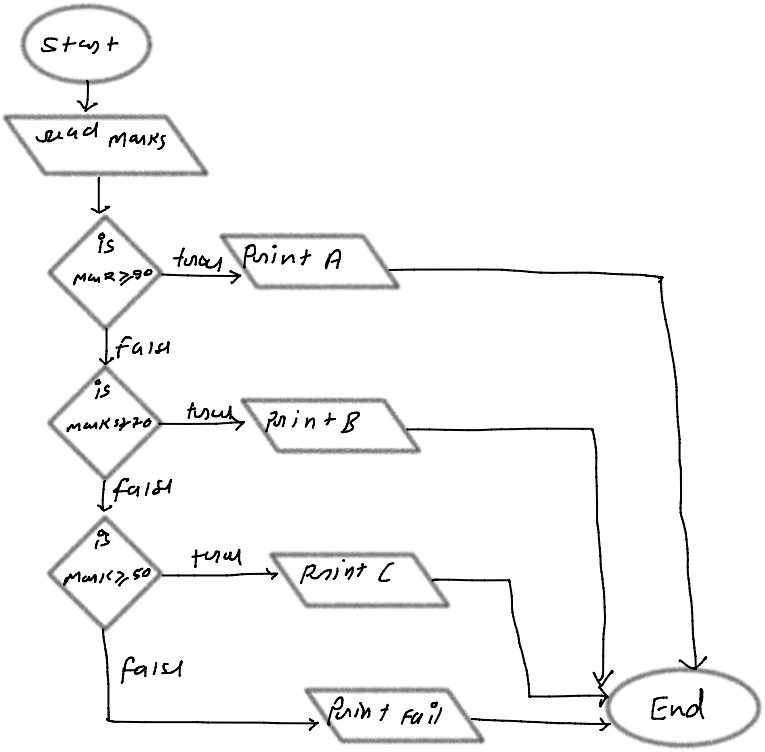

→ Check if number is +ve, -ve, or 0

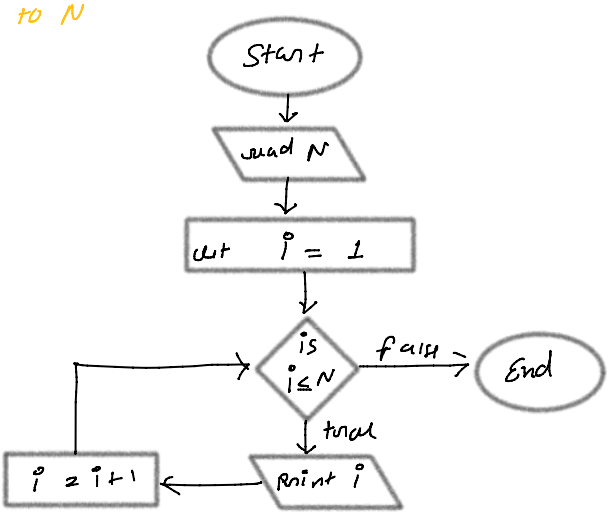

→ Student's Grade flow chart

MARKS	GRADE
⩾ 90	A
⩾ 70	B
⩾ 50	C
< 50	Fail

→ Counting from 1 to N

Example

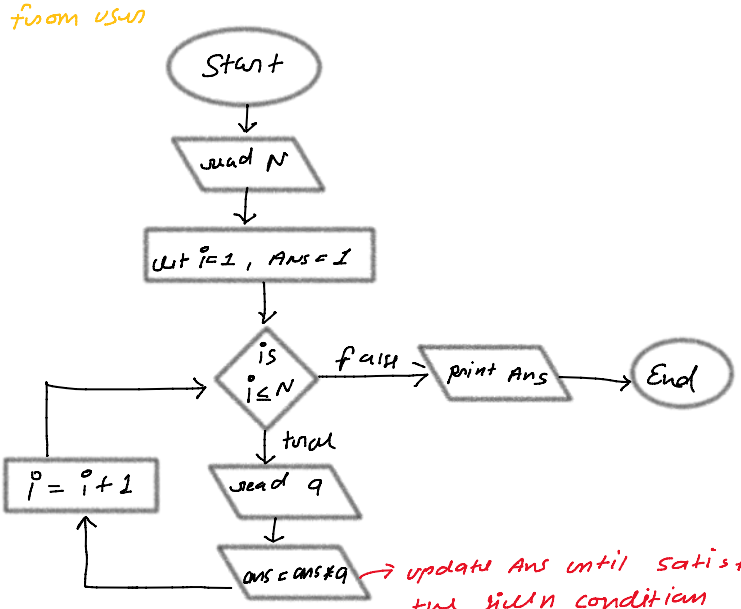

3 (N)

output 1 2 3

i	i≤N	print i	i=i+1
1	1≤3	1	2
2	2≤3	2	3
3	3≤3	3	4
4	4≤4		

4≤4 → END

→ multiplying N number from user

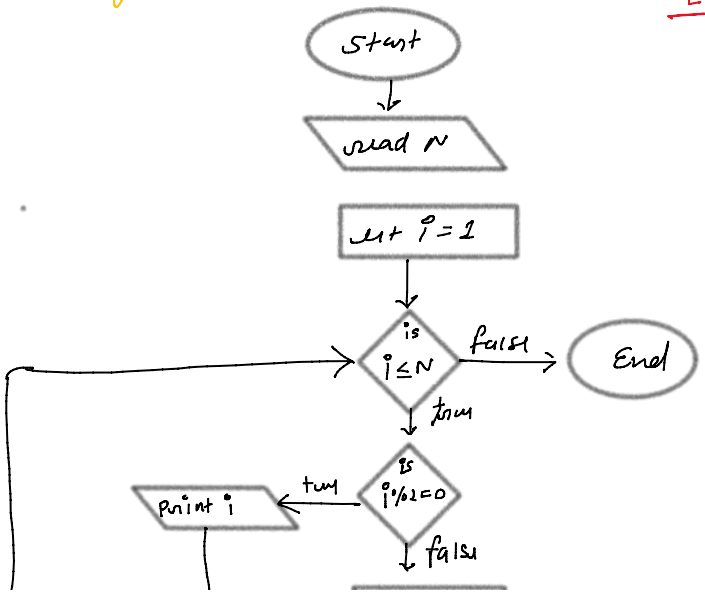

→ Print 1 to N, but only even number

Example

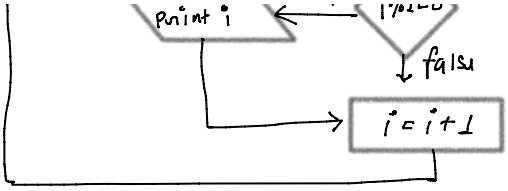

5 (N)

o/p — 2 4

i	i≤N	i%2=0	Print	i=i+1
1	1≤5	1%2≠0	—	2
2	2≤5	2%2=0	2	3
3	3≤5	3%2≠0	—	4
4	4≤5	4%2=0	4	5
5	5≤5	5%2≠0	—	6
6	6≤5			

6≤5 → END

END
